Main - Managing Masterdata

Some of Telema services require masterdata in Telema database:

- Webshop
- VMI, CMI
- MMT
- TeleSales
- Data Quality

Masterdata most used documents are:

- PRODAT - product list;
- PRICAT - price catalogue;
- PARTNER - partners list.

There are also:

- INVRPT - inventory report;
- SLSRPT - sales report;
- BALRPT - balance report.

Depending on the service and planned level of its use different set of masterdata is required.

For more specific details view product of interest description.

You can manage your company's masterdata either:

- automatically by sending masterdata documents from your ERP or
- [manually, using Telema Portal functionality](#) .

For more precise descriptions on managing masterdata view respective articles.

NB! You can use both ways of managing masterdata. In case your ERP is capable of creating only some document types you can manage remaining required document types in Telema Portal.
